

## **The new Skidmarx® plastic pallet will stop you in your tracks**

It's the lightest weight, lowest-cost plastic pallet on the market. If you've choked at the cost of other plastic pallets, you'll find Skidmarx® to be a "palletable" alternative.

### **Product Specs**

Less than 16 lbs.      40" x 48"  
Recycled resins  
2,000 lb. dynamic load  
True 4-way entry  
One piece, Injection molded  
Drain holes, steam cleanable  
Weather resistant  
Not rackable

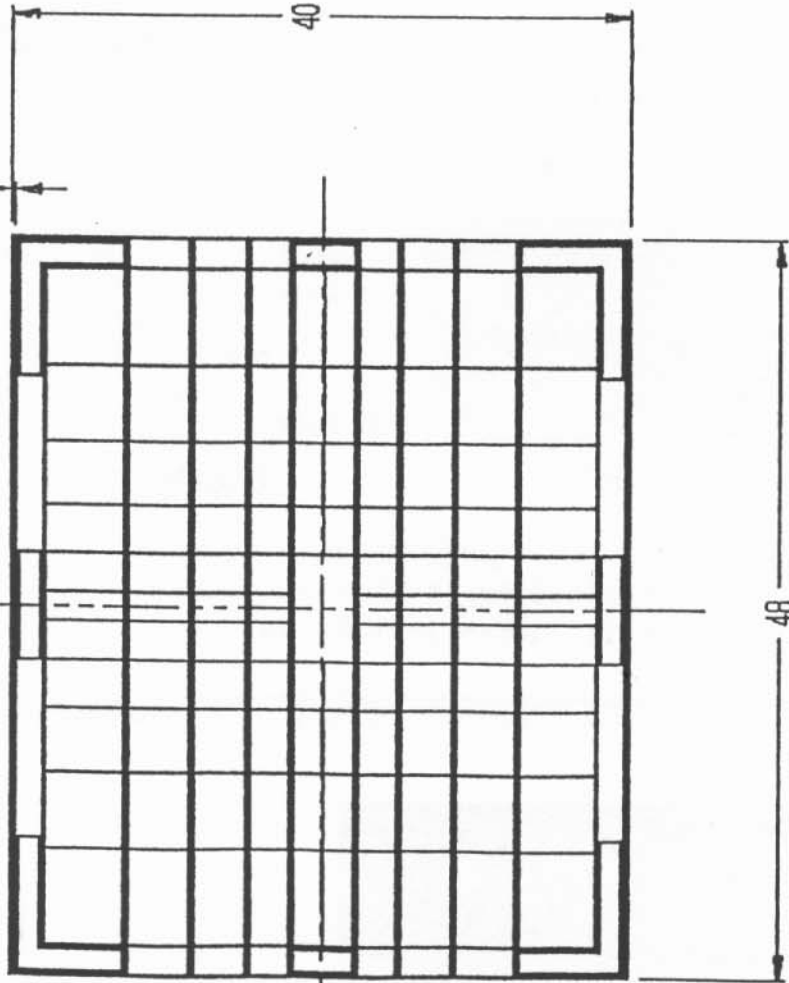

### **Nestable**

At left, 22 of these wood skids stack nearly 8 feet high, while 22 Skidmarx® pallets fit in a 5 foot 8 inch stack. It would take 31 Skidmarx® pallets to stack 8 feet high.

### **Recyclable**

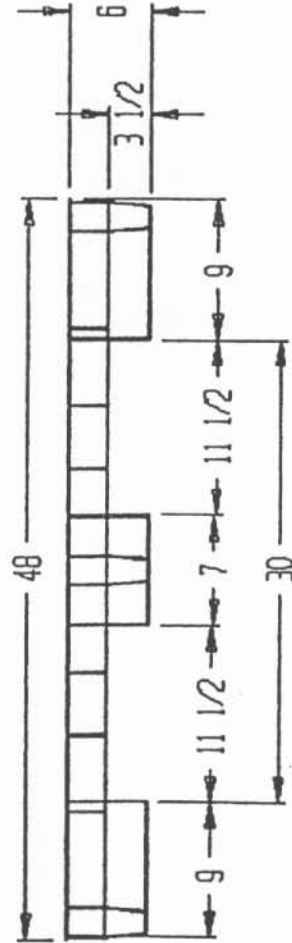

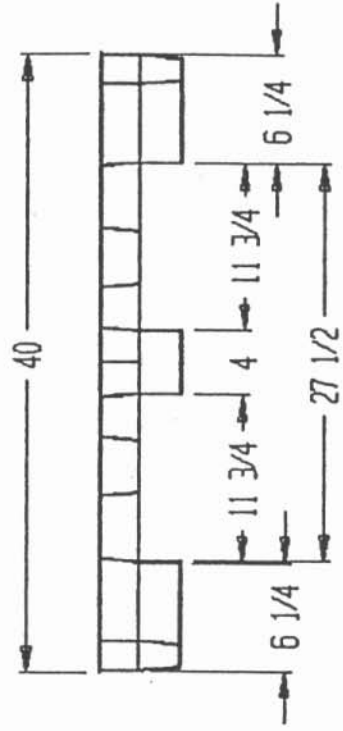

It costs you money to dispose of wood skids and landfill costs are only going to increase. Skidmarx® pallets are 100% recyclable. So when their useful life is through, you can return them to us for a credit.

1/8 PROTRUSION FOR SHRINK WRAP

### Notice

Pallets are designed to handle uniform, evenly distributed loads. Pallet legs must be supported by sturdy surface at all times, thus they will not work in an open rack system. Dynamic load rating of 2,000 lbs. means that is the maximum recommended weight to have on a pallet while it is being moved. Skidmarx® pallets are sold with the understanding that the customer will test them under actual conditions of use and will be solely responsible to determine the suitability of pallets for their intended use. Because of the variety of possible uses for the pallets, customer should carefully consider the fitness and performance of the pallets for each intended use, and customer assumes all risk in connection with such determination and use. Brochures published by Port Erie Plastics, Inc. shall not constitute warranties. In no event shall Port Erie Plastics, Inc. be liable for incidental or consequential damages of any sort.
